Ответы с пояснениями

Задание 1.

1. He said he had gone to the city centre the day before.
Если при обращении прямой речи в косвенную глагол в главном предложении стоит в Past Simple (said), то в придаточном предложении действует согласование времен. В данном случае Past Simple меняется на Past Perfect: went → had gone.
2. My mother said that she had washed the dishes.
Если при обращении прямой речи в косвенную глагол в главном предложении стоит в Past Simple (said), то в придаточном предложении действует согласование времен. В данном случае Present Perfect меняется на Past Perfect: have washed → had washed.

3. Kristy asked me whether I wanted to stay there.
Если при обращении прямой речи в косвенную глагол в главном предложении стоит в Past Simple (asked), то в придаточном предложении действует согласование времен. В данном случае Present Simple меняется на Past Simple: want → wanted.
4. She asked us why we had come so late.
Если при обращении прямой речи в косвенную глагол в главном предложении стоит в Past Simple (asked), то в придаточном предложении действует согласование времен. В данном случае Present Perfect меняется на Past Perfect: have come → had come.

Задание 2.

2. В данном примере должно соблюдаться согласование времен: I thought you had invited her to the cinema.
3. Я встретил девушку, которая живет поблизости. В данном примере согласование времен может не соблюдаться, поскольку в придаточном предложении сообщается фактическое, а не относительное время событий. Иными словами, девушка здесь всегда живет, и это факт, поэтому допустимо употребление Present Simple (lives near here).
4. В данном примере должно соблюдаться согласование времен: He told me he was preparing for his exams.
5. Ты заставил меня понять, как важно образование. В данном примере выражается общеизвестное положение или факт, поэтому согласование времен может не соблюдаться, и допустимо употребление Present Simple (how important education is).

2. +
Если глагол-сказуемое главного предложения стоит в настоящем или будущем времени, глагол-сказуемое придаточного предложения может стоять в любой временной форме, требуемой смыслом. Поэтому предложение составлено верно.
3. He knew he would have a problem.
Глагол-сказуемое главного предложения стоит в прошедшем времени – knew (Past Simple). Поэтому должно соблюдаться согласование времен, и в придаточном предложении глагол должен стоять в одном из прошедших времен – в данном случае во времени Future in the Past (would have).

Задание 4.

1. He realized he would be alone.
Глагол-сказуемое главного предложения стоит в прошедшем времени – realized (Past Simple). Поэтому должно соблюдаться согласование времен, и в придаточном предложении глагол должен стоять в одном из прошедших времен – в данном случае Future Simple меняется на Future in the Past (will be → would be).
2. We hoped she would be waiting for us at six o'clock.
Глагол-сказуемое главного предложения стоит в прошедшем времени – hoped (Past Simple). Поэтому должно соблюдаться согласование времен, и в придаточном

предложении глагол должен стоять в одном из прошедших времен – в данном случае Future Continuous меняется на Future Continuous in the Past (will be waiting → would be waiting).

3. He proved he was the best.

Глагол-сказуемое главного предложения стоит в прошедшем времени – proved (Past Simple). Поэтому должно соблюдаться согласование времен, и в придаточном предложении глагол должен стоять в одном из прошедших времен – в данном случае Present Simple меняется на Past Simple (is → was).

Вариант 1

Переведите текст, озаглавьте и письменно опишите главную мысль текста.

There are many interesting and useful professions, and it is really not an easy task to choose the right one.

I began to think about my future profession at the age of 15. My favourite subjects at school were mathematics and English. My teachers were well-educated people with deep knowledge of the subjects. They encouraged me in my desire to become an economist. Now I know well what I'm going to do after leaving school. I didn't make a blind choice. It was not a sudden flash either.

I opted for a career in business economics. I came to this decision little by little. It was my father who aroused my interest in that field. You see, he is a chief economist at a large plant and I often saw him work at home and discuss business matters with his colleagues.

To become a good specialist in economic matters and business one must know many sciences, such as business economics, finance and credits, statistics, history of economic theory and philosophy, mathematics, as well as economic management, trade business and, of course, marketing, which is a modern philosophy of business.

It is very important for a specialist in business matters to be a skillful user of computers and to speak at least one foreign language. It should better be English as it is the most popular language of international business communication.

You'll be able to follow business developments in the world by listening to radio and TV news, by reading newspapers or magazines, or by getting in contact with your business partners abroad.

If I pass my entrance exams successfully and enter the University, I'll try to study to the best of my abilities to achieve my life's ambition and to justify the hopes of my parents. I also hope that I'll never regret my choice and get a well-paid and interesting job afterwards.

Maybe I should consider a job in a world of banking. There's a surprisingly wide range to choose from, in the financial world.

For example, I could work for a big international company, run my own company, write about economics as a financial journalist, run my own International Business Research Agency, raise money for charities or just sell famous paintings.

Вариант 2

Переведите текст, озаглавьте и письменно опишите главную мысль текста.

The United States is the world's greatest economic power, measured in terms of gross national product (GNP). The nation's wealth is partly a reflection of its rich natural resources and its enormous agricultural output, but it owes more to the country's highly developed industry.

Despite its relative economic self-sufficiency in many areas, the United States is the most important single factor in world trade by virtue of the sheer size of its economy. Its exports and imports represent major proportions of the world total. The United States also impinges on the global economy as a source of and as a destination for investment capital.

The country continues to sustain an economic life that is more diversified than any other on Earth, providing the majority of its people with one of the world's highest standards of living.

The United States is relatively young by world standards, being barely more than 200 years old. America was the first of the European colonies to separate successfully from its motherland, and it was the first nation to be established on the premise that sovereignty rests with its citizens and not with the government.

In its first century and a half, the country was mainly preoccupied with its own territorial expansion and economic growth and with social debates that ultimately led to civil war and a healing period that is still not complete. In the 20th century the United States emerged as a world power, and since World War II it has been one of the pre-eminent powers.

Although the United States still offers its residents opportunities for unparalleled personal advancement and wealth, the depletion of its resources, contamination of its environment, and continuing social and economic inequality that perpetuates areas of poverty and blight all threaten the fabric of the country.

Speaker A

I live in the country but I've always wanted to move to a big city. I think that there are more career opportunities there, more jobs, people can get a better education and better medical services there. There is more entertainment in the city, too. You can go to theatres, cinemas and clubs, there are lots of people everywhere – you'll never get bored. I'll move to the city as soon as I get an opportunity to do so.

Speaker B

I live in a big city, in a new fast-developing area. Most of the buildings were built not long ago, so the area has a modern look and is comfortable to live in. There are shops, cinemas, schools, hospitals, sports centres and parks within easy reach of my house. Right in front of my house there's a bus stop, so I have no problem getting to the centre or any other part of the city.

Speaker C

We've just moved house and now I live in a new modern building in the centre of the city. My window has a view of a busy street but the interior creates a nice and peaceful atmosphere. The walls are painted light green and the furniture is in warm brown and creamy colours. There's a plasma TV and a portable audio centre. I like drawing and there are several of my pictures on the walls. I think they look nice there.

Speaker D

Everybody wants their home to be a safe, nice and comfortable place but their ideas of comfort and beauty are very different. In hot climates people sometimes make their homes underground. Living underground, however, doesn't mean living in dark, dirty and damp caves. Modern underground homes are light. They are beautifully designed, nicely furnished and very comfortable to live in.

Speaker E

When we were walking along the main street, the guide pointed to an ordinary looking house and said that the place had a history. During the war a famous doctor lived there. He arranged a hospital in his own home and saved lots of people. Now nobody lives in the house, there's a museum of science and medicine there. The museum has very interesting exhibits on the history of medical science.

The role of foreign languages in education.

During the educational process we learn different subjects and get different skills. It will help us in our future life to get interesting well-paid job and we want. But as usual there is always a foreign language in every educational curriculum. So why do we need foreign languages for? The answer is rather simple. There are for about 6 billions of people on our planet and all of them speak a great number of languages. Most popular of them are very necessary for every person in modern life. The reason is simple – to understand people from others countries and make communication with them easier. It is very important because people don`t live separately from each other. But it isn`t enough to know only popular languages. People also need to study ancient languages. Why? Because they are maternal to modern languages and learning them help us to understand modern languages better.

Environment Bug was walking the streets of Calgary, Alberta, and he noticed it was extremely cool, damp and rainy this summer. Everyone was complaining about it.

“What happened to summer?” Fran, a little girl asked her friend, Kelly.

“I don’t know,” said Kelly. “It has done nothing but rain here in Calgary for the last two months.”

“I heard it is supposed to be a nice weekend,” said Fran.

“I doubt it,” said Kelly. “I think this is the Summer of Rain.”

“More like the Summer of Storms,” said Fran. “We have had so many thunder, lightning and hail storms this summer. I have almost forgotten what a blue sky looks like.”

“Girls!” exclaimed Environment Bug. “What seems to be the issue here? I overheard you talking about the weather.”

“Who are you?” asked Fran, looking down at the Environment Bug.

“I am the Environment Bug,” said the Environment Bug.

“What does that mean?” asked Kelly.

“I take care of the environment,” said the Environment Bug. “I go around picking up litter, checking the weather and explaining to people about different environmental issues.”

“Except for picking up litter,” said Fran. “Your job sounds like fun. ”

“How come we have never heard of you before?” asked Kelly.

“Probably because I just moved to Calgary,” said Environment Bug.

“Welcome to our stormy city,” said Fran. “Are you able to tell us when this rain will stop?”

“I’m not the weatherman,” said Environment Bug. “However, there will be nice weather this weekend.”

“Oh good,” said Kelly. “We really need some warm weather.”

“It won’t just be warm this weekend,” said Environment Bug. “It is going to be a heat wave. A massive heat wave may be expected beginning this weekend that will bring unusually warm summer temperatures from coast to coast.”

“That means we get to go to the beach,” said Fran.

“That will be wonderful,” said Kelly. “Thank you Environment Bug. By the way, if you aren’t the weatherman, how come you know what the weather is going to be like this weekend.”

“I looked at the Weather Network app on my phone,” said Environment Bug, laughing.

Задание 1. Прочитайте текст профессиональной направленности и переведите его на русский язык. Ответьте на вопросы, данные к тексту.

Steels vary greatly but the major classes are carbon steels, low-alloy steels and high-alloy steels. Tool steels are special steels that are engineered to particular service requirements. These expensive alloys are exceptionally strong, hard, wear-resistant, tough, and nonreactive to local overheating. They contain tungsten, molybdenum, vanadium and chromium in different combinations, and often cobalt or nickel for better high-temperature performance. They are used for machine tools, aircraft undercarriages, in buildings and bridges.

1. What are the major classes of steel?
2. What is tool steel?
3. What characteristics do tool steels have?
4. What do they contain?
5. Where are they used?

Задание 2. Прочитайте текст профессиональной направленности и переведите его на русский язык. Ответьте на вопросы, данные к тексту.

By the beginning of the new millennium a great number of complex machine tools had been designed to speed up the production. Although these tools include features of the basic machine tools and perform the same operations, they incorporate design modifications that let them perform complex operational sequences quicker. Furthermore, after the production machine has been set up by a skilled worker or machinists, a less skilled operator also can produce parts accurately and quickly.

1. When had complex machine tools been designed?
2. Why had they been designed?
3. What is their advantage?
4. What features do they include?
5. Who can operate them?

Задание 3. Прочитайте текст профессиональной направленности и переведите его на русский язык. Ответьте на вопросы, данные к тексту.

In electric arc welding it's essential to hold the electrode approximately 4 mm from the surface of the workpiece. You should not leave the electrode too long in the same position because it will become attached to the workpiece. The electrode must be moved across the joint continuously backwards in a straight line. However, if it is moved too quickly neither the electrode nor the workpiece will melt. And it is important to remember that to weld plates by an electric arc is quite dangerous. In order to protect yourself you should always follow certain rules. For example, it is absolutely necessary to wear overalls with long sleeves, gloves, an apron, a cap and rubber boots. A mask or a helmet is used to protect the face and especially eyes from sparks.

1. What is the distance between the electrode and the surface of the workpiece?
2. Why should not you leave the electrode too long in the same position?
3. What is it important to remember in electric arc welding?
4. What is necessary to wear in electric arc welding?
5. Why is a mask or a helmet used?

Задание 4. Прочитайте текст профессиональной направленности и переведите его на русский язык. Ответьте на вопросы, данные к тексту.

Scientists consider that the oldest tools that are known to the mankind are 2600000 years old. They were used by people in manual operations and that is why they were called hand tools. By the beginning of the Industrial Revolution, people had already made simple hand tools for cutting and shaping different materials. But in the 18th century

there appeared machine tools that made mass production a reality in the 19th century. A machine tool is a power-driven machine that is used to perform different operations with metal or other material. Basic machine tools use mechanical power to bend, cut, drill metal into desired shapes. More advanced machine tools use such power sources as electrical or chemical, heat, magnetism and ultrasound.

1. How old are the oldest tools?
2. Where were they used by people?
3. Why were they called so?
4. When did the first machine tools appear?
5. What is a machine tool?

Задание 5. Прочитайте текст профессиональной направленности и переведите его на русский язык. Ответьте на вопросы, данные к тексту.

Steel is known as an alloy of iron and about 2% or less carbon. Pure iron is soft, ductile and malleable, useful only as an ornamental material. However, the addition of carbon hardens it greatly and changes its properties. Steels for special applications may contain other alloying elements beside carbon. This modifies and improves the physical properties of the base steel. For example, small percentages of nickel, chromium, manganese and vanadium may be used for strengthening steels for construction work. Heat treatment and mechanical working at cold or hot temperatures may also give steel alloys superior qualities, such as strength, hardness, toughness, wear resistance, corrosion resistance, electrical resistivity and workability.

1. What is steel?
2. How does the addition of carbon modify steel?
3. What may steel for special applications contain?
4. Where is it used?
5. What qualities may heat treatment and mechanical working give steel alloys?

Задание 6. Прочитайте текст профессиональной направленности и переведите его на русский язык. Ответьте на вопросы, данные к тексту.

Every mechanical workshop is equipped with machine tools. They are the main source for the manufacture of component parts of all machines and mechanical devices. There are about 500 kinds of machine tools. Some perform a single operation, such as drilling. Others, called machining centers, carry out several kinds of tasks. These numerous machine tool types fall into two categories. The first group is called “metal-cutting”, the

second – “metal-forming”. The machine tools of this group remove some material from the workpiece and they are much stronger than the workpiece itself. The examples of metal-cutting machines are lathes and drill presses.

1. What is mechanical shop equipped with?
2. How many kinds of machine tools are there?
3. What operations do they perform?
4. Why are machining centers called so?
5. What machine tools can be called metal-cutting?

Задание 4

Установите соответствие тем A-F текстам 1-5. Запишите свои ответы в таблицу. Используйте каждую букву только один раз. В задании одна тема лишняя.

1. Eating traditions.
 2. A treat and a song go together.
 3. Celebrate to get many presents.
 4. Holiday decoration business.
 5. Holiday food business.
 6. Cooking special holiday dishes.
1. Many stores in the USA stock a large range of holiday house decorations for a month before the holiday itself. For instance, on Thanksgiving Day they sell pumpkins and leaves specially designed for adorning. As for Halloween, stores offer flashlights, masks and skeletons for decorating the gardens and for scaring one's guests. Thus, people alter the attire of their houses several times a year. The wealthier families change not only the season's outside decorations but even the interior of their houses such as curtains, carpets and pictures.
 2. On the Eve of Thanksgiving day, most supermarkets are flooded with turkeys selling at lower prices. Turkey producers have to decrease their price because they

must sell all the turkeys as soon as possible, otherwise they will still have them when Christmas comes to even longer. Almost nobody buys turkey for an ordinary meal (during the rest of the year).at Christmas Americans also cook a turkey or they can choose another traditional dish, e.g. roasted ham.

3. One of the peculiarities of Americans is that do not usually sit around the table for a holiday meal. For larger groups, all the food usually stands on a special, separate table that is beautifully decorated. Everyone can serve themselves with the food they want. What is more, they do not usually have salads, which may seem rather strange for the Russians living there. Salads, to Americans, may be nothing more than tossed leaves of lettuce with a few other vegetables.
4. One more type of celebration, which is connected with presents, are “showers”, for instance a baby shower or a wedding shower. For a baby- shower, a pregnant woman is given presents for her future child, whereas for a wedding- shower a bride receives presents for her household. These showers are popular because on the one hand, it is usually a moderate price to rent a café or a restaurant and order some kind of snacks such as crisps and sauces and salads. On the other hand, it is very pleasant to be “showered” witch presents. Many people are usually invited to such parties.
5. As for Birthdays, it is worth mentioning that this holiday is for both friends and family. Often an additional party is organized by a company of friends at which time the one having the birthday is invited to a restaurant to celebrate. Besides a meal, they order a birthday cake and a ‘happy birthday song’ is performed by the staff of the restaurant. Guests are not expected to give presents at this kind of necessarily have a family feast; of course it depends on your family
